THE CONFERENCE

Established in February 1996, the Hong Kong Society for Transportation Studies (HKSTS) aims to foster excellence in transportation research and practice, stimulate professional interchange in transportation, and provide a forum for exchanging ideas on transportation developments.

Hong Kong is a major transportation and logistics hub of the Asia-Pacific region. With the increasing integration of the economies of the Pearl River Delta and South-east Asia, and increasing global market competition, advanced methods in operations research, management science, economics and statistics are needed for optimal planning and operation of complex large-scale multi-modal transportation systems. Practitioners and academics are cordially invited to share their knowledge, experience and insights on the design, analysis, planning, operation, engineering, co-ordination and management of transportation systems and their impacts. Please visit the conference website at: home.netvigator.com/~hksts/conf.htm for details.

HKSTS OUTSTANDING STUDENT PAPER AWARD

The Society has sponsored the HKSTS Outstanding Student Paper Award since the award was established in 2003. Postgraduate students who fulfill the requirements are welcome to submit a paper for the Award. The applicant must be the sole author of the paper. The full paper must not have been submitted for publication or published elsewhere. Please refer to the website for more details.

The HKSTS Outstanding Student Paper Award Subcommittee will shortlist no more than three student papers for a special session of the 13th HKSTS International Conference. A prize presentation will be held at the conference. HKSTS reserves the right not to award any prize should members of the Award Committee consider the quality of submissions or the performance of the candidates at the session to be unsatisfactory. Decisions of the Award Subcommittee shall be final.

The winner will be awarded a medal and a prize of HK\$2,500. The first and second runners-up will be awarded a certificate of merit for their excellence in research. The three short-listed papers will also be considered for publication in *Transportmetrica*.
