### 1. Activity of IRG in 2012-2013

SCATS data and manual turning counts (MTC) gathered for the entire Adelaide CBD area and the ring-route. Ten vehicles equipped with the Bluetooth devices and data collected over three month period. The analysis of the SCATS, MTC and Bluetooth data started.

### 2. Self-evaluation in 2012-2013

#### 2.1 Achievement

- Paper (Title, Authors, Year, Name of the Journal, etc.)

---

- Report and book

---

- Seminar, symposium and special session: (Title, Date, Venue & abstract)

---

- Group meeting: (Date, Venue & abstract)

---

- Result of application for the research grants:(Name & result)

---

- Promotional activities of your IRG: (Homepage, Newsletter, Mailing list etc.)

#### 2.2 Shortage point

Due to Transport undergraduate/postgraduate course restructuring and the commencement of the online courses (Australian Open University) some student work on this project has been delayed.

### 3. Activity plan in 2013-2014

The analysis of the SCATS, MTC and Bluetooth data started.

Two additional Honours level Civil engineering students to start their research in this area in 2013.  
This project continues to be a key research output for Honours level civil engineering students.

### 4. Special instruction (additional member etc.)

New projects relating to the core purpose of the IRG are in the planning with an expectation that later this year these projects will come to fruition.
