ABOUT THE SOCIETY

EASTS (Eastern Asia Society for Transportation Studies), an umbrella organization of transportation science societies in Eastern Asia, was founded in November 1994 following the meeting with transport experts from 13 countries/regions. The primary objectives of EASTS are to foster and support excellence in transportation research and practice and to stimulate professional exchange in all aspects and modes of transportation. There are currently 19 member domestic societies. We encourage more individual members and more member domestic societies who are interested in Easts activities.
